 LeetCode  Codeforces  GeeksforGeeks

Summary

Aspiring Software Engineer and final-year B.Tech CSE student skilled in Python, Data Structures & Algorithms, React.js, and Next.js. Experienced in building scalable and responsive web applications with clean architecture. Interested in System Design, AI/ML, and emerging technologies, with a strong focus on problem-solving and innovation.

Experience

AI Wallah

Generative AI Developer Intern

Remote

Aug 2025 - Oct 2025

- Developed and optimized Generative AI applications using LLMs for real-world use cases.
- Built prompt engineering pipelines to improve response accuracy and relevance. Integrated AI models with backend APIs for scalable deployment.
- Worked on data preprocessing and model evaluation to enhance output quality.
- Collaborated remotely with cross-functional teams to deliver AI features on time.

Bluestock™

Software Development Engineer Intern

Remote

Jun 2025 - Aug 2025

- Developed and maintained frontend features using React.js with a focus on performance and scalability.
- Built reusable, modular UI components using functional components and React Hooks. Implemented REST API integration to fetch, display, and update dynamic application data.
- Followed clean code practices and component-based architecture to improve maintainability.
- Gained hands-on experience with real-world production systems.

Prodigy InfoTech

Software Development Engineer Intern

Remote

- Developed and maintained frontend features using React.js with a focus on performance and scalability.
- Built reusable, modular UI components using functional components and React Hooks.
- Implemented REST API integration to fetch, display, and update dynamic application data.
- Followed clean code practices and component-based architecture to improve maintainability.
- Worked with JavaScript (ES6+) for efficient logic handling and state management.

Projects

WanderMind AI-Powered Trip Planner

Project Link

- Developed WanderMind, a full-stack AI-powered trip planner that generates personalized itineraries using Gemini AI and Google APIs, with a responsive UI built using React.js / Next.js and Tailwind CSS.
- Implemented secure authentication (JWT, bcrypt, Google login) and built scalable backend services using Node.js, Express.js, REST APIs, integrating Firebase / MongoDB for efficient data management.

Sorting Algorithm Visualizer

Project Link

- Built a Sorting Algorithm Visualizer demonstrating Bubble, Selection, Insertion, Merge, and Quick Sort with real-time animations.
- Added controls for array size, speed, and live statistics (comparisons, swaps, execution time).
- Developed a responsive web app using HTML5, CSS3, and JavaScript (ES6+) with smooth UI animations.

Education

Ambalika Institute Of Management And Technology, Lucknow

Jul 2022 – Present

B. Tech: Computer Science And Engineering: CGPA - 8.12/10

Skills

Programming: Python, Java, JavaScript

Web Development: React.js, Next.js, Node.js, Express.js, MongoDB, Tailwind CSS

AI/ML: NumPy, Scikit-learn, OpenCV

Core CS: Data Structures & Algorithms, OOPs, DBMS, Operating Systems, Computer Networks

Tools: Git, GitHub, Postman, Docker, VS Code

ACHIEVEMENTS

- Solved 500+ problems on LeetCode, strengthening skills in Data Structures & Algorithms.
- College-level winner in Badminton and Cricket, demonstrating teamwork, discipline, and competitive spirit.
